Hirmas-Adaury M, Castillo-Laborde C, Awad C, Jasmen A, Mattoli M, Molina X, Olea A, Matute I, Soto F, Rubilar P, Urrejola O, Alfaro T, Abusleme Lama MT and Esnouf S (2026) Corrigendum: Navigating Through Innovation in Elderly's Health: A Scoping Review of Digital Health Interventions. *Public Health Rev.* 47:1609579. doi: 10.3389/phrs.2026.1609579

One data was unintentionally omitted in **Table 2** "Summary of characteristics of included documents according to PCC model (Population, Context, Concept) (Worldwide, 2022)" as published.

In this table, next to the word caregivers, there should be a parenthesis with (n = 139). As it appears in healthcare level which has (n = 111).

In addition, in the percentage's column, the data of Family/Informal, Formal and Not specified should be modified by replacing:

- 17.3 with 52.5 in Family/Informal
- 12.4 with 37.4 in Formal
- 12.8 with 38.8 in Not specified

The corrected **Table 2** appears below.

In the first published version of the article, on page 5, the % of caregivers was calculated using a different criterion.

A correction has been made to **Results**, Population, Paragraph 1. The correct paragraph is: "The interventions were primarily aimed at the elderly population (93.3%, n = 393), followed by healthcare professionals (48.0%, n = 202), and caregivers (33.0%, n = 139). Among the interventions focused on caregivers, the most studied group were family or informal caregivers (52.5%, n = 73) (**Table 2**)."

TABLE 2 | Summary of characteristics of included documents according to PCC model (Population, Context, Concept) (Worldwide, 2022).

Characteristic of included documents (n = 421)		
Characteristic	N	%
Population		
Elderly	393	93,3
Healthcare professionals	202	48,0
Caregivers (n = 139)		
Family/Informal	73	52,5
Formal	52	37,4
Not specified	54	38,8
Disease or condition		
Chronic disease (hypertension, diabetes, cancer, obesity, chronic obstructive pulmonary disease, chronic pain, musculoskeletal, etc.)	218	51,8
Fragility (low grip strength, falls, balance disorders, etc.)	114	27,1
Neurological (Alzheimer's, dementia, etc.)	101	24,0
Mental health (depression, anxiety, social isolation, loneliness, etc.)	75	17,8
Healthy ageing and quality of life	55	13,1
Other ^a	21	5,0
Sensory impairment	8	1,9
Infectious disease	6	1,4
Context		
Region of country (world Bank Region)		
Europe and central Asia	149	35,4
North America	114	27,1
East Asia and Pacific	78	18,5
Other ^b	22	5,2
Middle East and North Africa	6	1,4
Latin America and the caribbean	5	1,2
Sub-Saharan Africa	3	0,7
South Asia	1	0,2
Worldwide	39	9,3
Not specified	4	1,0
Income of country (world Bank Income)		
High	337	80,0
Upper-middle	28	6,7
Lower-middle	4	1,0
Low	1	0,2
Other ^c	8	1,9
Worldwide	39	9,3
Not specified	4	1,0
Setting		
Home	320	76,0
Nursing home (Retirement home, community care Veterans' home, Senior living centers, Day care)	120	28,5
Healthcare facility	111	26,4
Other ^d	13	3,1
Healthcare level (n = 111)		
Primary	71	64,0
Secondary	61	55,0
Tertiary	53	47,7
Concept		
Health objective of the digital tool		
Monitoring or follow-up	265	62,9
Prevention	201	47,7
Therapy or treatment	200	47,5
Promotion	86	20,4
Diagnosis	80	19,0
Rehabilitation	70	16,6
Digital health interventions for persons
